Form Homework

Think up your own theme, and create a program with the following features:
1. A main form
2. Two or more other forms
    a. at least one modal form (dialog)
    b. at least one modeless form
    c. at least two event handlers on each form (click, load, or other)
    d. at least one other method in each form class
3. Two or more classes
    a. at least two individual fields, or one list or array field in each class
    b. a parameterized constructor in at least one class
    c. at least two methods in each class, besides the properties

Bonus: Include file input or output
